- Watching anime

## SAMMARY

I am an aspiring software developer and cyber security engineer with a strong foundation of programming languages, data structures and algorithms, networking in python and also many cyber security tools. I hope I can continues walking in this journey and accomplish great things along the way

## EXPERIENCE

Sadly the only chance have gotten to showcase my skills is through projects which are on my github account and my portfolio website but despite that I continue to grow and seek more knowledge. I hope that I can get a chance to improve my skills in real world someday and impact the world somehow.

<https://khisareuben.github.io/my-ultimate-portfolio->

My dream is to be a software engineer and a cyber-security engineer. I want to develop my own personal AI to help me in this long journey and keep me company somehow. Also creating my ultimate gaming room with a curved monitor, adjustable desk, mechanical keyboard and etc. I hope I can achieve all that live a meaningful life, am rooting for myself.
